

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	6 October 2026
Team ID	SWTID-2026-6524
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected problem statement: School IT helpdesk staff spend significant time manually reviewing and categorizing incident requests, causing delays and classification errors.

Step-2: Brainstorm, Idea Listing and Grouping

1. Automatic keyword-based ticket classification	Core automation
2. Dependent Category–Subcategory selection	Data consistency
3. Automated email confirmation to caller	Communication
4. Automatic assignment to appropriate support group	Routing
5. Ticket dashboard for category-wise monitoring	Monitoring
6. SLA tracking and escalation	Service management
7. Historical ticket analytics	Analytics
8. Predictive intelligence for future classification	Advanced extension

Step-3: Idea Prioritization

Idea	Impact / Importance	Feasibility	Priority
Automatic keyword-based classification	High	High	1 – Selected
Dependent Category–Subcategory logic	High	High	2
Automated email notification	Medium	High	3
Automatic support-group assignment	High	Medium	4
Ticket dashboard	Medium	Medium	5
SLA tracking and escalation	High	Medium	6
Historical ticket analytics	Medium	Medium	7
Predictive intelligence	High	Low/Medium	8 – Future extension

Prioritization basis: The selected solution has high importance because it directly reduces manual classification effort and high feasibility because the project implements it as a no-code Flow Designer automation.
